

Center-Line Trailers

Dedicated to Excellence

Press Release

Rick Benton, President and CEO of Center-Line Group announced that Sub-Pan Floors are now the standard on all truck bodies manufactured at their plant in Mansfield, TX.

“This process adds years to the profitability of a truck body. Keeping moisture, road salts, sands, etc. away from the wood allows that investment to live longer and it is just not a question for delivering a higher quality product”, said Benton.

“Our Sub-Pan floors are galvanized and therefore add a double insurance to the floors. We are the ONLY trailer manufacturing company that this is standard practice and therefore included in the price. Our customers have come to expect the best and the most innovative processes from us. As the leader in the industry we partner with our customers in making their business as profitable as possible by making their equipment work harder and longer than anyone else's out there”.

Any questions regarding this process can be directed to Mr. Rick Benton, President and CEO, Center-Line Group 855-877-5533.
